

Bioprime Agrisolutions was recognized with the prestigious "BioDiversity Guardian Award" for their pioneering work in developing BioNexus at the Sustainable Agriculture Summit and Awards 2024.

BioNexus initiative focuses on building an extensive microbe library that enhances agricultural productivity while promoting environmental sustainability. This recognition strengthens their resolve to deploy India's largest plant based microbe library to commercialize nutrient use efficiency & bio control solutions for the agricultural markets. BioNexus is India's largest plant based microbe library with 17700+ strains collected from 3 mega diverse regions & 13 agro-climatic zones across the country, making this library a unique wealth of knowledge.

Winning this prestigious award is a testament to their unwavering commitment to innovation and sustainability in agriculture. Bioprime Agrisolutions has set a new standard in the industry, driving positive change through cutting-edge solutions that not only enhance crop yields but also protect our planet. Their dedication to sustainable practices is truly inspiring, and we are excited to see their continued impact on the future of agriculture!
