

Congratulations to Ahammune Biosciences for raising \$5 Mn in Series A funding round!

Venture Center supported startup and BIG grantee- Ahammune Biosciences Pvt. Ltd. has raised \$5 Mn in series A funding round. The startup plans to use the fresh capital to conduct the second phase of human clinical trials for its drug candidate for vitiligo.

Founded in 2016 by Dr Parul Ganju and Dr Krishnamurthy Natarajan, Ahammune is a clinical-stage therapeutics startup working to foster innovative solutions for chronic skin diseases. Ahammune's pioneering new drugs for treating an autoimmune disease like Vitiligo with a novel and patent protected approach that does not rely on modulating immune response of patients can be a global game changer.

Venture Center is delighted to see Ahammune making confident strides in advancing their breakthrough technology closer to the market!
