

Congratulations to BioPrime Agrisolutions for raising \$6 million in Series A funding round!

Venture Center supported Biotech startup and BIG grantee BioPrime has raised \$6 million in Series A funding led by Belgium's impact fund Edaphon, with equal participation from existing investors Omnivore and Inflexor Ventures. BioPrime will use the funds to expand research in the crop protection segment, focusing on the co-development of novel biofungicides and bioinsecticides.

As one of India's leading biotech startups, BioPrime is at the forefront of sustainable agriculture, delivering crucial solutions for smallholder farmers. Venture Center is proud to have been part of their remarkable growth since 2016, and have been able to support their journey in various ways through mentoring, investor connects, financial assistance (BIRAC-BIG, BIRAC LEAP Fund, BIRAC SEED Fund), and through our analytical services.

Congratulations to the team and here's to many more milestones ahead!
