

Biodimension Technology Secures ₹121 Lakh in Funding Led by Campus Angels Network

BioDimension Innovators with Campus Angels Network Founders

Biodimension Technology Private Limited, a cutting-edge deep tech startup focused on human tissue and organ development, has successfully closed a ₹121 lakh funding round led by Campus Angels Network. This investment will accelerate Biodimension's mission to revolutionize the healthcare and pharmaceutical industries with innovative tissue models that enable more efficient, ethical, and human-relevant testing for drug and cosmetic safety.

Founded in 2021 by Manoj Kumar Sampath (CEO), Ranjith Kumar Velusamy (Chief Innovation Officer), and Pradeep Arunachalam (Chief Operating Officer), Biodimension Technology has rapidly emerged as a leader in biofabrication technology. The company develops functional replicas of human tissues to serve as a platform for drug, chemical, and cosmetic testing. Their products provide an ethical alternative to animal testing, addressing significant challenges in pharmaceutical R&D and meeting the growing global demand for cruelty-free testing methods.

Biodimension Technologies are recipients of the Call 19 Biotechnology Ignition Grant. Venture Center is proud to have supported their journey and wishes them continued success!
