

**Congratulations to KB Cols on the inauguration of their demonstration plant!**

*Congratulations!*  
KBCOLS SCIENCES

Venture Center supported startup and BIG grantee, KBCols is expanding their capabilities, furthering their mission of creating sustainable colors! As an innovative technology driven startup, KBCols Sciences is deeply committed to reducing the load of harmful chemical colors in almost every industry and with hopes to change the landscape of dyeing in the apparel industry as well as increase the use of natural colors in high-end value sectors.

This new pilot plant, built over a 6000 sq. ft. area, not only signifies an extension in their production capabilities, but also represents the trust and faith of the customers, investors and believers.

Congratulations to KBCols team and wishing them continued success!
