

Venture Center welcomes Trebirth Private Limited to its deeptech equity portfolio

<http://www.big.venturecenter.co.in/trebirth-private-limited/>

Venture Center is thrilled to welcome Trebirth Private Limited to its deeptech equity portfolio through the investment under the BIRAC Seed Fund Scheme to help propel their efforts to transform pest detection in grape farming and other crops.

Trebirth's pioneering approach uses advanced X-ray and Doppler radar-based systems to provide non-invasive scanning solutions. These technologies enable farmers to detect and treat stem borer infestations with exceptional accuracy, reducing crop losses and boosting agricultural productivity.

With this support, Trebirth will accelerate the development and deployment of its innovative solutions, helping farmers tackle challenges in pest management and ensuring better agricultural outcomes.

Congratulations Mukund Choudhary and the rest of the Trebirth team!
